Institute of Biomedical Engineering and Nanomedicine

Investigator Recruitment

The Institute of Biomedical Engineering and Nanomedicine at the National Health Research Institutes (NHRI) in Taiwan is focused on product-oriented research. Integrative programs are being organized in this Institute in biomedical engineering, biomedical imaging and nanotechnology with the aims toward to successful clinical translations and industrial development in Taiwan. Candidates should have a Ph.D. or equivalent degree in medical electronics. Applicants with industrial research/development experience and application skills are highly desired.

Position open at the level of Investigator, Associate Investigator, and Assistant Investigator (the equivalent of Assistant Professor, Associate Professor, and Professor in Universities).

Application should include: a letter of intent, curriculum vitae with publication list, a brief research proposal, reprints of selected publications, and three reference letters sent directly to the corresponding person.
